I do web-scraping to collect statistics about data science related jobs in Switzerland.

The first link is to a csv file containing all data science related jobs' ads that I got from jobs.ch in September 2019:

https://drive.google.com/open?id=114O26nu2yX8k8bShQZfJAxVNjwqtOW93

The first part of the code in the jupyter notebook does that.

This is a link to a an open dataframe with information about swiss cities, used for the analysis
